

## Professional Summary

---

A passionate learner, I am eager to sharpen my perspective on the modern world. I enjoy combining and applying the skills I learned throughout my academic and professional career to understand, adapt and codify processes and procedures. I am developing my skills to identify and organize the data needed to make decisions. I have concentrated on the interpretation and useful implementation of standards for information security and business continuity. I understand the challenges posed by the security requirements of such norms and regulations. I implement them designing more efficient processes and, in the end, more pleasing and productive working environments.

## Experience

---
